

Attachment 1: Survey Advertisement

Hi,

We are conducting a research study to develop an Automatic Speech Error Correction (ASEC) system. As part of this study, we are seeking feedback from the public on the quality of synthesised speech audio files. We would greatly appreciate your participation in this study by rating the audio files in a short survey.

The survey will take approximately 10-15 minutes to complete and will require you to listen to 10 audio files and rate their quality on a scale from 1-5. No personal information will be collected or shared, and your responses will be completely anonymous.

To participate in the study, please click on the following link [insert link to survey]. If you have any questions or concerns, please feel free to contact us.

Thank you for your time and consideration in this important research endeavour.

Sincerely,

Sunny Ma
